Brilliance Preschool & Academy provides an opportunity for local parents to get information on local news.

There's nothing more important than a child's education. For over a decade Brilliance Preschool & Academy has been reaching out to the students in their community, helping pave their way to a better future through a blend of customized learning techniques. Now they're sharing their knowledge

and experience with the parents in the Dallas community with the launch of the Brilliance Blog.

The Brilliance Blog being launched will give parents the latest headlines in Dallas daycare and education, along with a healthy collection of parent resources, including information on early childhood education and helpful tips for helping their children thrive both in and out of the classroom.

The Brilliance Blog is the next step in reaching out and connecting parents and their children with the Dallas community. "Brilliance Academy is a change leader in the new millennium, providing an opportunity for...active parents to develop intellectual skills in children that will help them succeed in a competitive and global society," says Kelly Mayberry, Director at Brilliance Academy. When Brilliance Academy first launched in January of 1996 the institution set-out not to be another Dallas day care. Over the years their commitment to excellence and their dedication to building a positive learning environment for their students have made them the premier early childhood education center for preschoolers and elementary students through grade 4.

"Brilliance Preschool & Academy was founded in January of 1996 to fill a need for preschool education," Ms Kelly Mayberry exclaims. In the following years, the institution added 1st - 4th grades based on the success of their original programs.

This growth is directly attributed to the positive development that parents have witnessed during their children's preschool attendance at Brilliance. She adds, "We inspire, in our students, creativity, exploration and social skills that will be valuable in the years to come, as well as fully preparing them for the integration of new technologies and world cultures."

Check out the Brilliance Blog at <http://www.BrillianceAcademy.com/blog.htm> and visit Brilliance Academy on the web to find more about their early childhood education experience at <http://www.BrillianceAcademy.com>.
